

SIP Paging Amplifier

The new CyberData SIP-enabled Paging Amplifier provides an easy method for implementing a loud IP-based overhead paging system for loud areas, warehouses, manufacturing areas, and outdoor areas.

Now with up to 9 user-stored messages and 25 watts of driving power (802.3at), the Amplifier provides direct drive of up to two 8 Ohm horns.

The interface is compatible with most SIP-based IP PBX servers that comply with the SIP RFC 3261. For non-SIP environments, the Paging Amplifier can be configured to listen to multicast address and port number combinations to form paging zones.
